Housing Agency Survey 2019. Research on residential satisfaction and aspirations in Ireland. Codebook.

Sample size

There are 511 respondents in the dataset. For a nationally representative sample, a weight variable can be applied as described below.

Storage format

.sav	SPSS
.dat	tab-delimited file
.dta	Stata 14.0

Weights

SPSS syntax to apply weight for a nationally representative sample:

WEIGHT BY WEIGHT.

Dataset should be cited as:

Housing Agency (2019). Housing Agency national survey of apartment householders' residential satisfaction and aspirations in Ireland, 2019. [data collection]. Version 1. Irish Social Science Data Archive.

Anonymisation of data

The dataset was reviewed according to the UKAN standard.

There are no direct identifiers in the dataset. Name, address and telephone number were collected at the time of the survey by Amarach Consulting and stored separately to the main dataset. The identifying data was destroyed by Amarach two months after collection was completed.

The dataset was assessed for indirect identifiers and the wider picture assessed by running descriptive statistics and crosstabs to find unique cases, that is, combinations of variables that could identify an individual. Following assessment, some variables were redacted from the dataset, as listed in *Variables in the questionnaire, not in the dataset.*

Variables

Variables in the questionnaire, not in the dataset

Consent Q   Has the respondent signed the consent form?

QS2   County of birth if born in Ireland (including Northern Ireland)

QT   Country of birth, if elsewhere abroad

QUB to QUP   What is your nationality? Series of 15 dichotomous variables for 15 named nationalities

Address   Respondent's home address

Qa2   Telephone number

Qa4   Full name

Variables in the dataset, not in the questionnaire

WEIGHT   WEIGHT VARIABLE

QNEWREGIONQ   Province/Capital location

QNEWRENTQ   Tenure type

QSCDQUOTA   Socio-economic groups
