# Speed

## Going fast

On an SLR – Shutter Priority

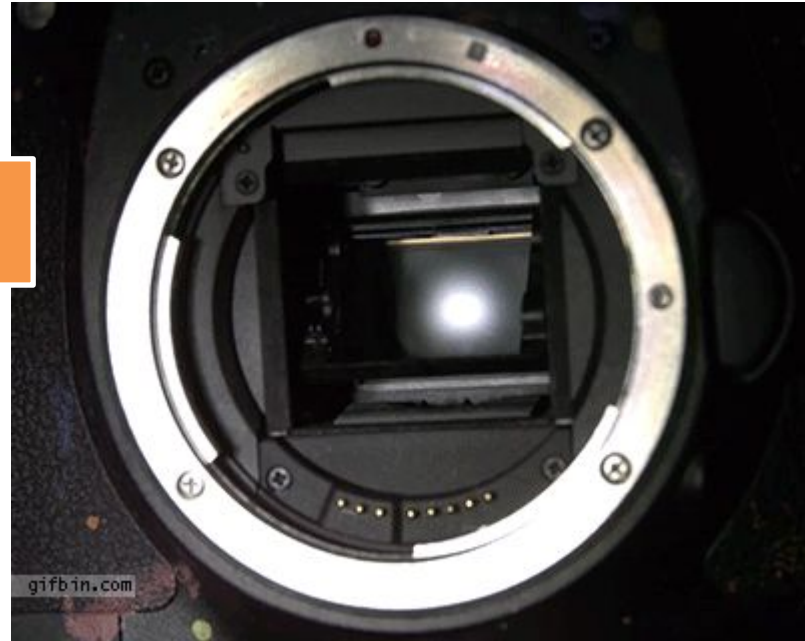

On a phone – Burst fire

## Going slow

On an SLR – Time Value / Shutter  
Priority

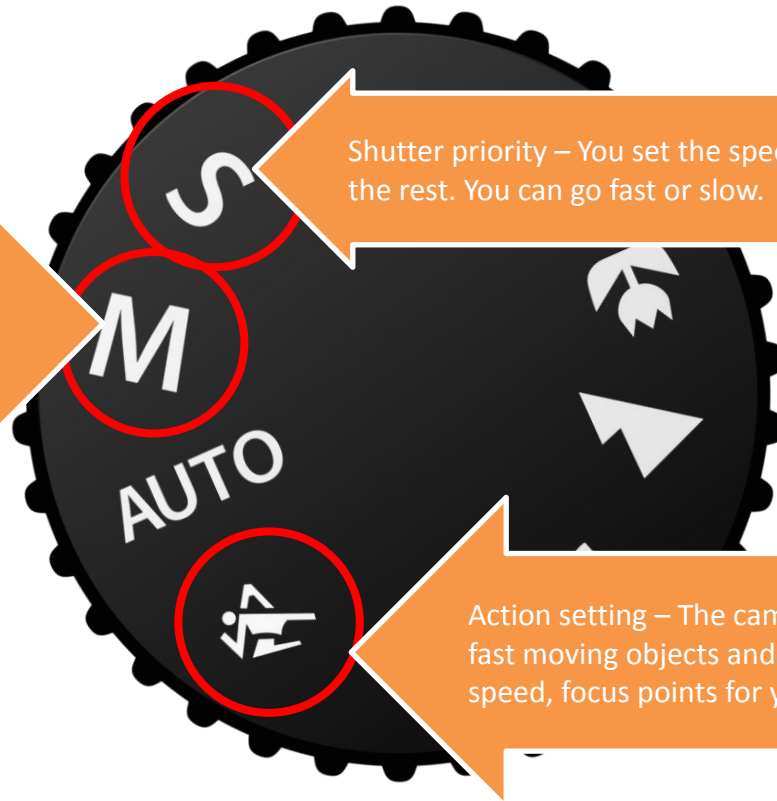

On a phone – Time Lapse

## What's a shutter?

- Think of it as a curtain being pulled back to let in light briefly.
- Phones don't have one

# Adjusting your camera

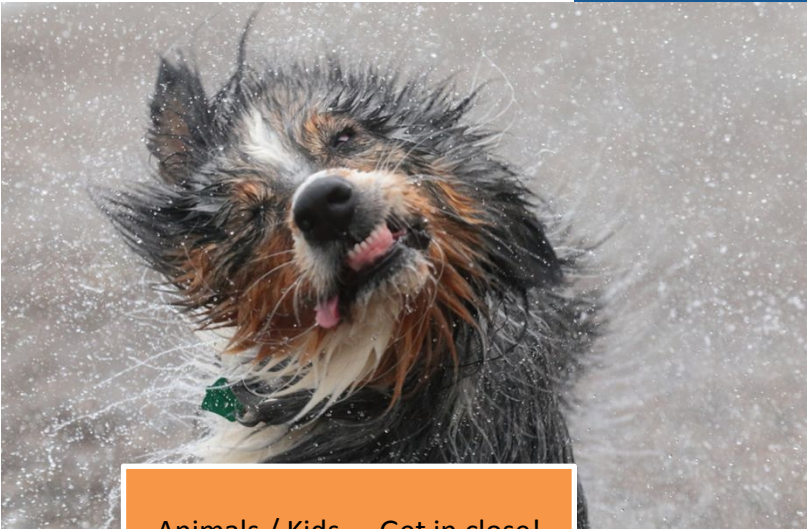

Manual mode – You can select the shutter speed...but you also have to set everything else up!

Shutter priority – You set the speed, the camera does the rest. You can go fast or slow.

Action setting – The camera will adjust to fast moving objects and change ISO, shutter speed, focus points for you.

Going Fast

Animals / Kids....Get in close!

Phone: Burst mode

SLR: Shutter speed

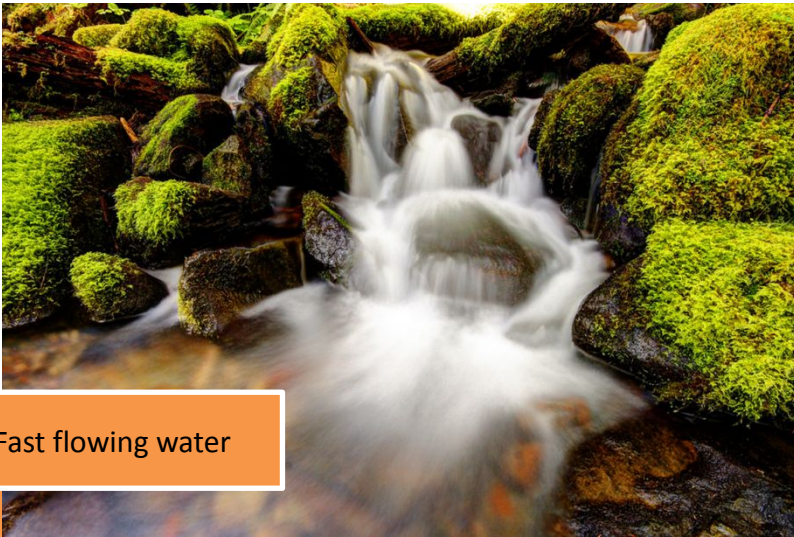

Going slow – SLR suggestions

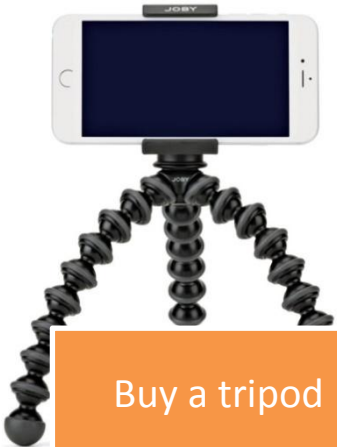

Car lights

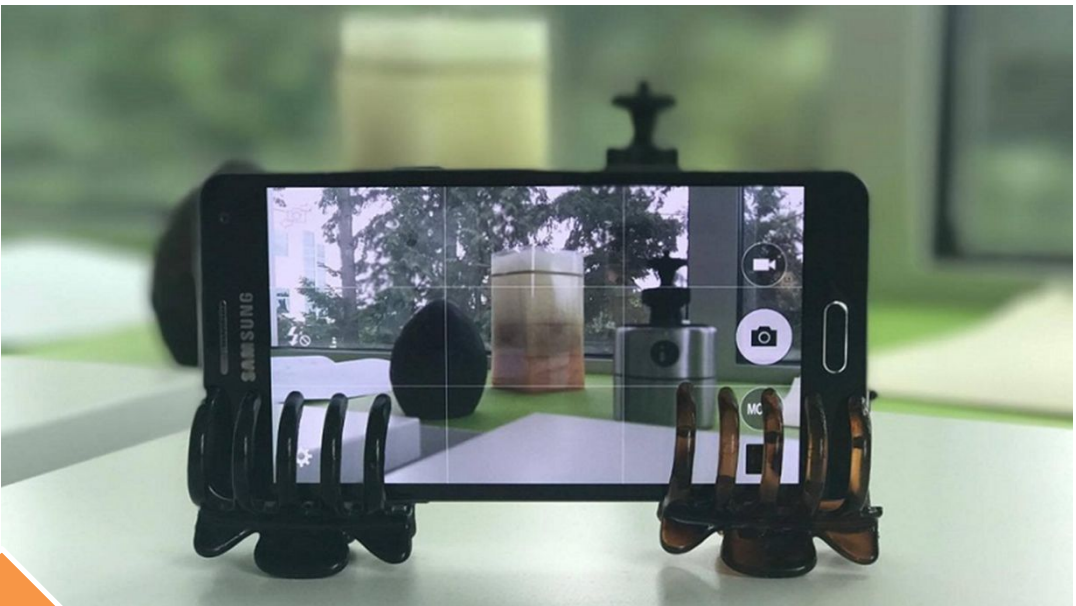

Carnival / Ferris wheel

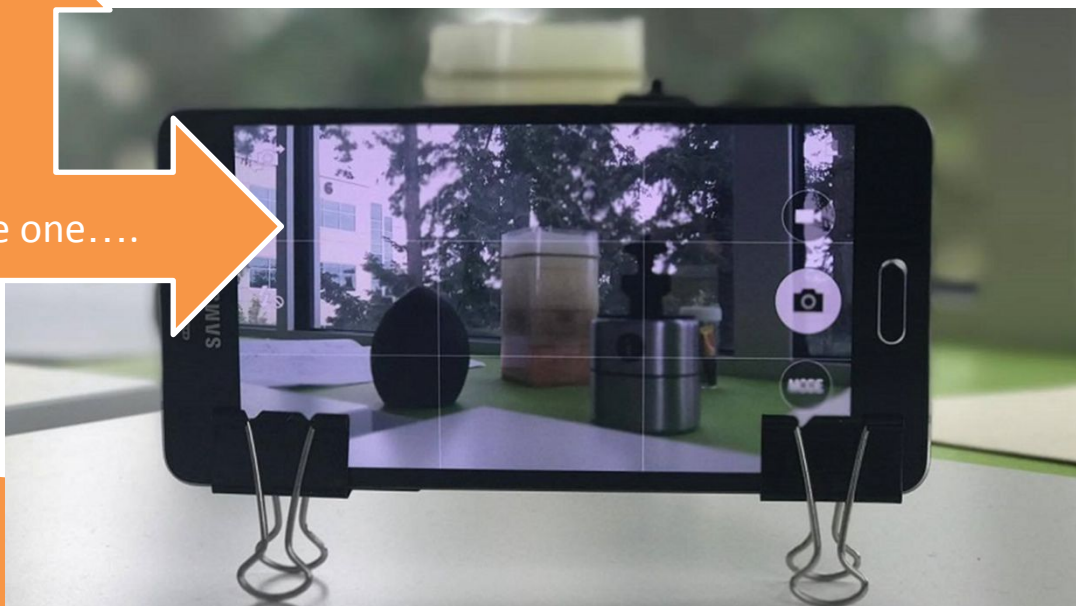

Fast flowing water

Buy a tripod

Or make one....

Going slow – Phone suggestions

Clouds passing

Sunrise / sunset / tide coming in and out

City crowds
