UCD School of Veterinary Medicine

**“Provide working mothers with more support in childcare, by creating more affordable creches and afterschool facilities.”**

I qualified cum laude from the Faculty of Veterinary Medicine of Sassari (Italy). After a four year residency in diagnostic imaging at UCD during which I obtained the RCVS Certificate in Veterinary Diagnostic Imaging, I obtained the European Diploma in Veterinary Diagnostic imaging in 2006, becoming an EBVS boarded specialist. I have been an assistant professor in UCD Faculty of Veterinary Medicine since 2007, covering the roles of academic and clinical radiologist. I am coordinator of the Clinical musculoskeletal module in Stage IV and coordinator of Stage IV undergraduate/Stage III graduate. In 2019 I obtained the Professional Diploma in University teaching and learning from UCD UTL. I am passionate about all aspects of my job and my favourite imaging modality is radiology. My favourite hobbies are reading and listening to good music. My biggest passion in life are my two incredible sons, Iker and Seán.
